## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 39 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 39 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

## **DETAILED ACTION**

### ***Acknowledgment***

1. This Office Action is responsive to the Amendment filed on 10/25/2007.

### ***Allowable Subject Matter***

2. Claims 1-13 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or suggest the arrangement of a chip card having a card body; chip module embedded in the card body and incorporating an integrated circuit, the card body including at least one security feature incorporated in a layer, or applied on the surface, of the card body; and especially, the card body further comprises an additional tamper-detection layer including a conductive pattern forming an electrical loop connected between terminals of the integrated circuit, and especially, the conductive pattern having at least one region located beneath or above the security feature; and especially, wherein the integrated circuit is adapted to perform an integrity check of the conductive pattern for conditionally performing further operations only in case the integrity is recognized as recited in claims 1 and 8 and further limitations of their respective dependent claims 2-7 and 8-13.

The admitted prior art teaches a chip card that having a card body and a chip module that is embedded in the card body and incorporates an integrated circuit (see pages 1-2 of the instant application). The previously cited reference McCabe et al. (US 6,068,192) teaches a temper resistance card that having a housing; wherein the

housing including a first and second portion that are connect together; wherein the first and second portion each having a conductor; an integrated circuit chip supported in the housing (see figure 1 and the abstract). The cited reference Zercher (US 6,702,185 B1) teaches an identification device including an integrated circuit; a plurality of layers (see figure 4). Without the benefit of applicant's teachings, there is no motivation for one of ordinary skill in the art at the time the invention was made to combine the various features from the prior art in a manner so as to create the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
